EXPERIENCE

Mask Group — *Front-End Developer*

October 2020 - PRESENT

I took role maintaining multiple websites backed by Wordpress and Magento.

Gedik Holding — *Intern*

August 2020 - September 2020

I built a link shortener using Svelte for front-end and NodeJS for back-end. Then i replaced NodeJS with Firebase. I worked on a Certificate Generator's front-end during my internship as well.

EDUCATION

Gedik University — *Information Security*

2019 - PRESENT

PROJECTS

Weather Scraper — *Web Scraper (Python)*

Used Selenium for creating a web scraper. It scrapes the accuweather.com and prints out specified month's forecast. See in GitHub

Vueweeter — Realtime *Twitter Clone*

Used Firebase Firestore for creating a realtime twitter clone. See Live | See in GitHub

Games — *3 Published Games in Google Play*

I published 3 Hyper-Casual games in Google Play. "Split", "Jumpy" and "Stay in the Shadows". See in Google Play

SKILLS

* VueJS, Svelte, React

* NodeJS, Firebase

* Python

* C#
